SUMMARY

I am a freshly graduated web developer with a strong foundation in HTML, CSS, JavaScript, React, and Three.js. Eager to stay current with industry trends, I am committed to continuous learning. I'm excited to create engaging, innovative web experiences.

EXPERIENCE

Junior Web Developer

Amrind Remedies

📅 2022 - 2023

- Developed web applications using HTML, CSS, and JavaScript.
- Created dynamic user interfaces with React and Vue.js.
- Integrated RESTful APIs for data manipulation.
- Optimized web performance and ensured responsive design.
- Collaborated with cross-functional teams to implement UI designs.
- Conducted code reviews and provided guidance to team members.
- Stayed updated on the latest web development trends and technologies.

PROJECTS

Music Player

- Interactive music player with JavaScript
- Includes audio playback, song progress tracking, and play/pause controls
- Enables users to navigate through a playlist of songs and control playback
- Offers keyboard shortcuts for navigation and play/pause functionality
- Provides song information such as title, artist, and album cover display

<https://jade-bubblegum-513427.netlify.app/>

Weather App

- Fetches weather data from OpenWeatherMap API
- Updates the interface to display weather information
- Allows users to check the weather for a chosen city

<https://legendary-marzipan-53edaa.netlify.app/>

Student Management System

- Manages student data
- Utilizes PostgreSQL for data storage
- Integrates with Cloudinary for content management and serving
